

Zy Guillermo

Zymon Miko D. Guillermo

Lead Software Development Engineer in Test

Lead SDET with 6 years of experience designing and leading web and mobile automation frameworks and functional QA initiatives. Demonstrated technical leadership through framework ownership, team leadership, engineering standards, and testing strategy. Experienced in C#, Testim, and Playwright, with a strong focus on AI-driven quality engineering through the creation of Sentinel, an AI-powered QE agent. Highly adept at leveraging emerging technologies to accelerate testing, optimize workflows, and deliver scalable automation solutions.

BS Computer Science
STI Colleges
2021

Skills/Tools

- Application Development
- NUnit | .NET Framework
- AI Agent Engineering
- Test Automation
- Microsoft Office
- Azure DevOps
- Browserstack
- Visual Studio
- TypeScript
- Playwright
- JavaScript
- Selenium
- Appium
- Claude
- Cursor
- Github
- Linear
- Agile
- Java
- SQL
- C#
- AI

Experience

March 2024 - Present
Axos Bank | Axos Business Center

March 2024 - Present
Led the development and establishment of the Playwright automation framework in TypeScript for the OLB 3.0 web banking application while leading the functional QA team for the UDB 3.0 mobile banking application. Drove automation strategy, framework architecture, and engineering standards across both initiatives. Leveraged prior experience with C#-based automation frameworks and Tricentis Testim to strengthen automation practices and guide technical decisions. Created Sentinel, the QE organization's first AI-powered QE agent, capable of identifying and reporting bugs, retesting fixes, and validating PBIs through integrations with Playwright, Azure DevOps, and Linear. Directed initiatives end-to-end by managing PR reviews, enforcing coding standards, and coordinating team deliverables. Championed continuous improvement through the adoption of emerging technologies and AI-driven testing approaches. Actively contributed to technical discussions and company decisions, providing strategic input on testing direction while mentoring engineers, supporting team development, and fostering collaboration.

December 2023 - March 2024
Inland Revenue Authority of Singapore | Accenture Inc.

Responsible for the data preparation for the UAT of a live web application using SQL Server Management Studio, Postman and Jmeter.
Utilized automated tools for updating and editing tables in the database.

August 2022 - December 2023
Australian Taxation Office | Accenture Inc.

Successfully accomplished Functional and System Testing for a web application functionality that just went Go Live in production last November 2023.
Responsible for executing and maintaining test automation scripts using Selenium-(Java) for the purpose of Regression Testing of the other functionalities.

June 2021 - August 2022
Ciergio | Ahente App | Orange and Crane Innovations

Performed overall testing for the web and android mobile application of the project while also working closely with the whole product development team including the clients and businesses as for the Quality Assurance responsibilities. Pioneered the use of test automation tools in the company for reducing the time spent on Regression Testing and workload.
